## FAT DISSOLVING SOLUTION

# Lipo Lax<sup>+</sup>

Innovative fat burning therapy  
based on lipolysis

EXPERIENCE THE NEW PREMIUM PRODUCT FROM SOUTH KOREA **LIPO LAX** AN INNOVATIVE FAT BURNING THERAPY BASED ON LIPOLYSIS THAT IS SIMPLE AND EFFECTIVE AT DIMINISHING CELLULITE AND EXCESS WEIGHT

Obtaining a slim figure without cellulite and excess weight is a challenge for most people. A sedentary lifestyle, improper diet and metabolic disorders lead to the formation of fat deposits and the notorious "orange peel", making it difficult for people to achieve their ideal physical bodies.

**Modern pharmacology offers lipolytics, substances that can hydrolyze fatty deposits.**

# LIPOLYTICS FOR MESOTHERAPY – LIPO LAX

## 01

### HOW DOES IT WORK?

---

The effects of **Lipo Lax** are driven by lipolysis, a process that results in the cleavage of one molecule of triglycerol (the substance that makes up an adipocyte, or fat cell) into three molecules of fatty acid and one molecule of glycerol. This splitting occurs with the help of injections, which, upon entering the fatty tissue, causes the release of fat from the adipocytes.

One of the main causes of obesity is the excess of lipid synthesis over the processes of their digestion. In this case, the excess fat remains in the body and accumulates in the subcutaneous fat between muscle fibers and on vessel walls. **Lipo Lax** combats these deposits.

## 02

### THE EFFECTS OF **Lipo Lax**<sup>+</sup> CAN BE DESCRIBED AS FOLLOWS

---

+

+

When introduced into the subcutaneous tissue, **Lipo Lax** increases the osmotic pressure within the cells and splits the fat into its components, which causes the cell membrane to rupture

The cleavage products of the adipocyte enter the lymph flow and blood via the damaged membrane and are excreted by the kidneys and liver

Flat scars form at the introduction site of **Lipo Lax** (inside the cellulose), which contribute to the destruction of adipose tissue

# 03

## BENEFITS OF APPLICATION

- ✓ There is no need for anesthesia
- ✓ The procedure for administering **Lipo Lax** is very simple and effective, convenient and, above all, painless
- ✓ **Lipo Lax** dissolves and destroys fat cells (fat cells are eliminated through sweat and urine)
- ✓ **Lipo Lax** is effective against cellulite and, due to the peptide content, makes the skin supple and elastic
- ✓ **Lipo Lax** quickly removes fat deposits in parts of the body that cannot be reduced with physical exercise or diet
- ✓ **Lipo Lax** guarantees a safe treatment, due to the highest purity of raw materials; Maximizes the effectiveness of lipolysis

# 04

## USING **Lipo Lax**+, YOU CAN CORRECT THE FOLLOWING AREAS

Using Lipo Lax, you can correct the following areas:

Chin area

Fat deposits in the abdomen, as well as lateral folds

Reduce the volume of fat tissue in inner thighs and knees

Reduce the volume of fat tissue in the shoulders, back and on the back of the hands

Contours of the hips and buttocks

# 05 Lipo Lax<sup>+</sup> APPLICATION PROCEDURE

---

+

+

Preliminary treatment of the skin with alcohol lotion or chlorhexidine

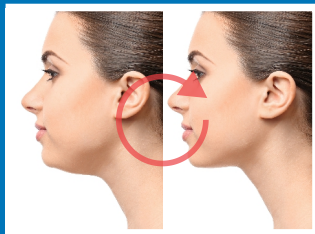

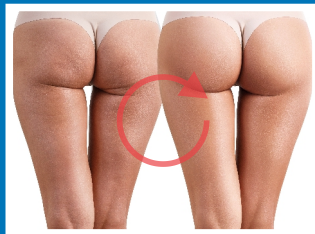

Introduction of the drug into the area of the body where it is necessary to activate lipolysis

Final treatment of the skin with antiseptic

# 06 RESULTS

---

After just one session of lipolytic mesotherapy with **Lipo Lax**, you can get rid of unwanted local fatty deposits, cellulite and flabby skin. After the third session, you will notice that the injection areas have decreased, local accumulations of adipose tissue in problem areas ("ears" on the thighs, sides, second chin, etc.) have disappeared and the skin in the treated areas has become smoother and elastic.

# 07

## RECOMMENDATIONS FOR USE

Before beginning the procedure, the cosmetologist should perform an initial consultation with the patient to learn about their medical history, determine the problem areas, perform the initial measurements, in addition to estimating how many injections per session and how many treatment sessions are needed to achieve the desired results. The procedure should take place under sterile conditions, which eliminates the risk of infection. **Lipo Lax** is injected with the thinnest single-use needle into the subcutaneous fat of the areas requiring correction. The process is no more painful than any other injection and, to make it as comfortable as possible, an anesthetic cream is used in most cases. After the injections are administered, the patient will need to rest for about half an hour under the supervision of a doctor and drink at least 0.5 liters of water.

Type of needles used in the procedure	30G
Course of procedures	7-15 sessions (up to the required result)
Frequency of procedures	1 procedure every 14-21 days
Duration of therapy	3-6 months
Duration of the procedure	15-20 minutes
Rehabilitation period	1-2 days

Areas of application	Dose	Depth of injection
Hips / Legs / Buttocks	30-40 ml*	6-13 mm
Chin zone	10-20 ml*	3-4 mm
Belly / Waist	30-40 ml*	6-13 mm

*\*(Selected individually, depending on the degree of obesity and other physiological features)*

### ATTENTION!

**+** INJECTIONS SHOULD ONLY BE ADMINISTERED INTO FATTY DEPOSITS, SUBCUTANEOUSLY.  
BEFORE USE, SHAKE THE VIAL CONTENTS.

# 08

## CONTRAINDICATIONS

---

- ✓ Individual intolerance of the main drug components
- ✓ Liver or kidney disease
- ✓ Endocrine system disorders
- ✓ Cancer
- ✓ Epilepsy
- ✓ Varicose veins
- ✓ Autoimmune diseases
- ✓ Blood clotting disorders
- ✓ Exacerbation of chronic illness (ulcer, arthritis, bronchitis, herpes)
- ✓ Pathological tendency to scarring

**If all contraindications are observed, complications after injections will not occur.**

Composition	
Phosphatidylcholine (PPC)	1000 mg
Deoxycholate	5 mg
Purification of PPC	99,8%
L-Carnitine	200 mg

# Lipo Lax<sup>+</sup>

HIGHEST QUALITY DUE TO TOP-QUALITY, RAW MATERIALS AND THE STRICT OBSERVANCE OF THE MANUFACTURING PROCESS
